DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 5-7, 13-16, 23, 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Zufle. Zufle shows an armored system comprising at least one ballistic plate (20) configured to transfer substantially all weight thereof to directly to the vehicle through a vehicle seat (22) or at least one attachment point on the vehicle. Zufle discloses that the ballistic plate may extend to or attached directly to other portions of the vehicle (see col. 4 lines 30-40) at attachment points, which would lie between the floor and the ballistic plate and inherently upward from a vehicle hatch to the ballistic plate (i.e., when mounted on the side of the vehicle or vehicle door). Hanger straps (36) connects the ballistic plate to the vehicle attachment points (40). A ledge (see Fig. 8) is provided on the ballistic plate to support the weight of another ballistic plate (30). Zufle further shows an attachment point (via straps 32), which would lie above an occupant.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

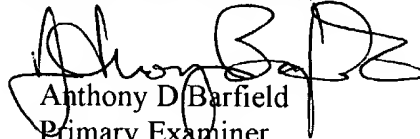

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3636

4. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zufle in view of Bachner Jr. Zufle shows all of the teachings of the claimed invention except the use of a load transferring mechanism. Bachner Jr. teaches the conventional use of a load transferring mechanism (16), which extends over the shoulder of an occupant, in order to support a second ballistic plate (14). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the armor system of Zufle with the load transferring mechanism, as taught by Bachner Jr. in order to provide more protection for an occupant.
